Technology used to expand our freedom in many ways. Ever since the dawn of humanity, new inventions have been helping us better achieve our goals, faster and more efficiently. The changes were slow however, taking centuries for new technologies to refine and spread. The industrial revolution turbocharged this process, so did computers. What we see [...]

This chapter introduces the concept of sociotechnical imaginaries, showing how it fills a gap between theoretical work on the nature and origin of collective social imaginations and empirical work on the politics of science and technology. Emphasizing the role of both practices and performance in constituting imaginaries, the chapter distinguishes sociotechnical imaginaries from other related ...

Freedom Promotes Technological Progress. There is a reciprocal relationship between technology and freedom. A free market unhampered by government intervention is the most fertile environment for technological and economic progress. Freedom is a prerequisite for progress in an unpredictable and risky world.
