Novell Documentation: NetWare 6 - Server Operating System ...  
The original NetWare product in 1983 supported clients running both CP/M and MS-  
DOS, ran over a proprietary star network topology and was based on a Novell-built  
file server using the Motorola 68000 processor, but the company soon moved away  
from building its own hardware, and NetWare became hardware-independent,  
running on any suitable Intel-based IBM PC compatible system, and a wide range of  
network cards. From the beginning NetWare implemented a number of features  
inspired by mainframe and mi
