In addition to the specific application, the size of the Desiccant Dryer is primarily determined by the medium, flow rate, operating pressure, inlet temperature and the required pressure dew point. Hankison desiccant dryers are suitable for flow rates from 9 m³/h to 13,000 m³/h.

Hankison: Desiccant Dryers

HMW series desiccant dryers use electrical heaters inside of the desiccant bed for regeneration of the saturated desiccant. The direct contact of the finned heater tubes with the desiccant bed makes most efficient use of the regeneration energy. A small part of the compressed air flow of only 2.2% removes the moisture and cools down the desiccant.

Hankison: HMW

Hankison® refrigerant compressed air dryers are best used with a Hankison ∅ SF pre-∅ lter and a HF after-∅ lter. Title: SPX - Data Sheet Hankison H-PET Author: SPX Flow Technology Moers GmbH Created Date: 3/20/2014 3:20:13 PM ...

Hankison Desiccant Dryer Manual FULL Version HD Quality ...

Compressed air enters the dryer and is directed to Tower 1 by valve (A), and then to the dryer outlet through shuttle valve (B). A portion of the dried air is throttled to near atmospheric pressure by means of orifice (C). This extremely dry, low-pressure air flows through and regenerates the desiccant in Tower 2 and is exhausted through purge/repressurization valve (D) and exhaust muffler (E) ...
