~~Flash Anatomy Flash Cards: The Head and Neck Muscles~~

The muscles in the neck are responsible for the movement of the head in the cervical region in all directions. The musculature of the neck is comprised of a number of different muscle groups. They can be divided into anterior, lateral and posterior groups based on their position in the neck. They are further divided into more specific groups based on a number of determinants; including depth ...

~~Neck muscles anatomy: List, origins, insertions, action ...~~

Nevertheless, the exact number is difficult to define because different sources group muscles differently, e.g. regarding what is defined as different parts of a single muscle or as several muscles. The muscles of the human body can be categorized into a number of groups which include muscles relating to the head and neck, muscles of the torso or trunk, muscles of the upper limbs, and muscles ...
