Human rights and health - World Health Organization

A human rights-based approach (HRBA) to health focuses attention and provides strategies and solutions to redress inequalities, discriminatory practices (both real and perceived) and unjust power relations, which are often at the heart of inequitable health outcomes. It defines health as a "right" rather than an entitlement or "need".

WHO | Human rights - World Health Organization

Human rights provide a unifying framework for global health governance, and over the past 25 years institutions of global governance have increasingly implemented human rights to advance global health.

Human Rights in Global Health Governance - Health and ...

The right to health is a fundamental part of our human rights and of our understanding of a life in dignity. The right to the enjoyment of the highest attainable standard of physical and mental health, to give it its full name, is not new. Internationally, it was first articulated in the 1946 Constitution

The Right to Health - OHCHR

When must public authorities respect your human rights? Public authorities must respect your human rights when they provide you with health or care services - for example, when you're in hospital or when social services assess your care needs. They must also respect your human rights when they commission and plan services - for example, when a local authority contracts with a private organisation to provide care services. Next steps

Protecting your human rights when using health and care ...

The right to health is the economic, social, and cultural right to a universal minimum standard of health to which all individuals are entitled. The concept of a right to health has been enumerated in international agreements which include the Universal Declaration of Human Rights, International Covenant on Economic, Social and Cultural Rights, and the Convention on the Rights of Persons with Disabilities. There is debate on the interpretation and application of the right to health due to consid

BMC International Health and Human Rights is an open access, peer-reviewed journal that considers articles on the influences of human rights violations on health in developing and transitional countries, as well as all issues relating to the impact of health policies, programs and practices on human rights.

BMC International Health and Human Rights | Home page

COVID-19 is an unprecedented global threat, and human rights should be at the core of the global response—as states have legally binding obligations to do so and there is evidence that human rights-based policies strengthen public health. Where human rights are inextricably linked to public health outcomes and interconnected in the COVID-19 response, governments should adopt laws that are proportionate, necessary and non-discriminatory towards society's most vulnerable members and should ...

Health and human rights are inextricably linked in the ...

Description: Health and Human Rights explores the reciprocal influences of health and human rights, including the impact public health programs and policies have on human rights, the consequences human rights violations have on health, the importance of health in realizing human rights, and the ways in which human rights can be integrated into public health strategies.
