In my opinion, neither the oil level nor the plug choice will cause a 750 to smoke. The engine does not "know" how much oil is in the tank. One quart or 3, all it cares about is that there is enough oil in the tank to feed the draw from the oil pump. One quart in the tank is enough. No contribution to smoking. The plug is definitely a non-starter.

Honda introduced several 200cc motorcycles with similar engines but different body variations in the 1980s. The model introduced in South Africa and Pakistan was known as the CD200 RoadMaster . It had a twin cylinder 10-degree cylinder angle with a 360-degree crank shaft angle engine which meant the pistons moved together and reached top dead centre (TDC) and bottom dead centre (BDC) at the ...
