10.4: Human Organs and Organ Systems - Biology LibreTexts

Definition of Body Systems. We can define body systems as groups of organs and tissues that work together to perform important jobs for the body. There are some organs in our body which are part of more than one body system as they serve more than one function. Apart from these, other organs and tissues serve only one purpose in the body system. All body systems are necessary for an organism to be able to survive and reproduce.

Body Systems Definition - List of Body Systems and Their ...

The human body is a collection of organ systems which all work together to keep you going. Your heart, lungs, kidneys, stomach, and liver are examples of organs. An organ system is a group of organs having similar function and working together to do an important job.
