IEC 62548:2016 sets out design requirements for photovoltaic (PV) arrays including DC array wiring, electrical protection devices, switching and earthing provisions. The scope includes all parts of the PV array up to but not including energy storage devices, power conversion equipment or loads. An exception is that provisions relating to power conversion equipment are covered only where DC safety issues are involved.

International Standard 62548 has been prepared by IEC technical committee 82: Solar IEC photovoltaic energy systems. This International Standard cancels and replaces the first edition of IEC TS 62548 published in 2013. This International Standard includes the following significant technical changes with respect to IEC TS 62548:

~~Edition 1.0 2016-09 INTERNATIONAL STANDARD NORME~~

...

Scope and object This International Standard sets out design requirements for photovoltaic (PV) arrays including DC array wiring, electrical protection devices, switching and earthing provisions.... IEC/TS 62548. July 1, 2013. Photovoltaic (PV) arrays – Design requirements.

Abstract IEC 61400-26-1:2019 defines an information model from which time-based, and production-based availability indicators for services can be derived and reported. The purpose is to provide standardised metrics that can be used to create and organise methods for availability calculation and reporting according to the user ' s needs.
