community and secondary care settings. It includes preventing healthcare-associated infections that develop because of treatment or from being in a healthcare setting.

*Overview / Infection prevention and control / Quality ...*

The infection control guidelines are the Health and Safety at Work Act (HASAWA) 1974, the Control of Substances Hazardous to Health (COSHH) Regulations 2002, and the Reporting Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013. Despite this, there isn't really one specific infection control law in the UK. However, these three major set of regulations all touch on the issue.

*What are the Infection Control Guidelines? / Infection Control*

Infection Control Guidance; Using Personal Protective Equipment (PPE) Hand Hygiene; Discontinuing Transmission-Based Precautions; Postmortem Guidance

*Infection Control Guidance for Healthcare Professionals ...*

These guidelines provide information that will support general practices to put in place all the reasonable infection prevention and control measures that are required to protect service users and care workers from infection and enable general practitioners to meet the requirements of the Health and Social Care Act 2008.

*Infection Control Policies*

This guideline covers preventing and controlling healthcare-associated infections in children, young people and adults in primary and community care settings. It provides a blueprint for the infection prevention and control precautions that should be applied by everyone involved in delivering NHS care and treatment.
