Introduction To Information And
Communication

Information and Communications
Technology forms part of the core
curriculum for all Leaving Certificate
Applied students. It is intended to give
students the skills and understanding
to use computers in both their current
and future lives. The Leaving
Certificate Applied programme offers
the ideal forum for students to apply
these skills in a practical way,
particularly in presenting task work
and key assignments across the full
spectrum of the curriculum.

Introduction To Information

Introduction to Information and Communications Technology

This chapter provides an introduction to the information theory and communication theory. It provides an understanding of the information measures and the bounds given by them, e.g., bounds on source coding and channel coding. The chapter also describes source coding and channel coding on the basis of some well known algorithms.

message entirely. The cycle gives the process of communication.

INTRODUCTION TO
COMMUNICATION - WikiEducator
ICT, or information and
communications technology (or
technologies), is the infrastructure
and components that enable modern
computing. Although there is no
single, universal definition of ICT, the
term is generally accepted to mean all
devices, networking components,
applications and systems that
combined allow people and
organizations (i.e., businesses,
nonprofit agencies, governments and
criminal enterprises) to interact in the
digital world.

Introduction To Information And Communication

Introduction to Information & Communications Technology

A 1958 article in Harvard Business Review referred to information technology as consisting of three basic parts: computational data processing, decision support, and business software. This time period marked the beginning of IT as an officially defined area of business; in fact, this article probably coined the term.
