oil, or another base along with solvents, additives, and resins to form the paste needed to create what is known as paint.

However in the end paint is man-made by default.

Read PDF Introduction To Paint Chemistry And Principles of Paint

Paint is any pigmented liquid, liquefiable, or solid mastic composition that, after application to a substrate in a thin layer, converts to a solid film. It is most commonly used to protect, color, or provide texture to objects. Paint can be made or purchased in many colors and in
