Ishihara Color Vision Test Plates High Resolution Stock ...

The Ishihara test is a color perception test for red-green color deficiencies, the first in a class of successful color vision tests called pseudo-isochromatic plates. It was named after its

designer, Shinobu Ishihara, a professor at the University of Tokyo, who first published his tests in 1917. The test consists of a number of colored plates, called Ishihara plates, each of which

contains a circle of dots appearing randomized in color and size. Within the pattern are dots
