The best thing to do is to get the van to some one who can read the faults, most garages these days will have a hand held tool that will show what fault has caused the light to come on, it will give a "P-Code" e.g. P1212, These codes will pinpoint the exact cause of the problem, and with so many possibilities and the cost of parts its simply not worth guessing.

2004 Iveco tector edc code shown = low fuel pressure? Hi , 2004 Iveco tector 7.5 t 70000 miles .It has a fault code on the edc which the garage told me relates to low fuel pressure ,the the engine runs smoothly but wont rev over 2700 rpm also it is completeley down on power. It will get to 56 mph on the flat but even the slightest of hills it slow down to very low speeds please tell what needs changing to recify the problem .MANY THANKS .
