"In this eccentric and erudite book, in which a flea looms as large as an emperor, Rosen sets out to establish the forces that transformed the Mediterranean world of late antiquity into medieval Europe. Justinian's Flea is a massively ambitious work that covers a great deal of ground. It is a history of the eastern Roman empire and its many enemies, as well as a survey of the great city fo Constantinople, a new Rome straddling seven hills and smelling strongly of fermented fish sauce.

Justinian's Flea

Justinians Flea, as its title, description, and introduction are eager to announce, examines how the bubonic plague epidemic in the sixth century contributed to the demise of the Roman Empire. Already on shaky ground but no means down for the count, the empire was struggling to maintain a hold on its lands in western Europeincluding Rome itselfeven as the Persians and Huns intermittently harried its eastern borders.

The Plague of Justinian or Justinianic Plague was the beginning of the first plague pandemic, the first Old World pandemic of plague, the contagious disease caused by the bacterium Yersinia pestis. The disease afflicted the entire Mediterranean Basin, Europe, and the Near East, severely affecting the Sasanian Empire and the Roman Empire and especially its capital, Constantinople. The plague is named for the Roman emperor in Constantinople, Justinian I who, according to his court historian Procop

Plague of Justinian - Wikipedia

That's one of the unexamined assumptions that started me thinking about Late Antiquity in the first place. In the introductory chapter of Justinian's Flea, I followed the lead of a number of historians in comparing 6th century Rome to 6th century China (one of the most intriguing is found in a ten year old online article written by Daniel Foss). Each had been an empire for more than five hundred years, and had seen its territory halved by increasingly aggressive barbarian invasions.
