But if you want to use the native Windows VPN client you can still use L2TP over IPsec. I had a look around the net to work out how to do this and most decent articles are written using the older versions of the ASDM , and the CLI information I found on Cisco's site didn't help either.

~~Cisco ASA - L2TP over IPsec VPN | PeteNetLive~~

In this tutorial, we will configure a fresh VPS running Windows Server 2019 as an L2TP over IPsec VPN. L2TP or Layer 2 Tunneling Protocol is a tunneling protocol but it does not provide strong encryption. IPsec comes into picture here, which provides very strong encryption to data exchanged between the remote server and client machine.

~~Set up an L2TP/IPsec VPN on Windows Server 2019~~

Give the VPN service a name, then click Create. L2TP is an extension of the Point-to-Point Tunneling Protocol used by internet service providers to enable a VPN over the internet. IPsec (Internet Protocol Security) is a set of security protocols. IKEv2 is a protocol that sets up a security association in IPsec.
