Language maintenance denotes the continuing use of a language in the face of competition from a regionally and socially more powerful language. Language shift is the opposite of this: it denotes the replacement of one language by another as the primary means of communication within a community. The term language death is used when that community is the last one in the world to use that language. The extinction of Cornish in England is an example of language death as well as shift (to English).

Language shift and language maintenance as a field of inquiry dates back to the earliest days of sociolinguistics, in particular the work of Joshua Fishman—above all, his monumental and groundbreaking Language Loyalty in the United States. Factors contributing to language maintenance and shift are diverse and complex, making the science of prediction elusive if not impossible, though scholars have proposed models and typologies of relevant factors.

Language Shift and Language Revitalization - Oxford Handbooks
Language shift, also known as language transfer or language replacement or language assimilation, is the process whereby a speech community shifts to a different language, usually over an extended period of time. Often, languages that are perceived to be higher status stabilise or spread at the expense of other languages that are perceived by their own speakers to be lower-status. An example is the shift from Gaulish to Latin during the time of the Roman Empire.
