The Brain and the Law - David Eagleman
Abstract Combining law and the brain as a matter for study requires the integration not just of two apparently remote fields of study but also of two profoundly different orientations towards research and study.

Law and the brain: Introduction | Philosophical ...
Focusing on human behaviour, this book addresses questions of law as reflecting brain activity, emphasizing that it is the organization and functioning of the brain that determines how we enact and obey laws. It also applies the developments in brain science to debates over criminal responsibility.

Brain-imaging studies have reinvigorated the neurophilosophical and legal debate of whether we are free agents in control of our own actions or mere prisoners of a biologically determined brain.

Law, Responsibility, and the Brain
Those challenging the legal status of brain death have made three distinct types of claims: that prevailing medical criteria fail to measure what the law requires, that clinicians must obtain family consent before conducting brain death diagnostic tests, and that clinicians must accommodate religious objections to brain death. 3 There are other philosophical and conceptual challenges, such as whether brain death is death of the organism as a whole. But this "biological" death challenge ...

Neurolaw is a field of interdisciplinary study that explores the effects of discoveries in neuroscience on legal rules and standards. Drawing from neuroscience, philosophy, social psychology, cognitive neuroscience, and criminology, neurolaw practitioners seek to address not only the descriptive and predictive issues of how neuroscience is and will be used in the legal system, but also the normative issues of how neuroscience should and should not be used. The rapid growth of functional magnetic

Neurolaw - Wikipedia
Brain death is legal death If someone's brain dead, the damage is irreversible and, according to UK law, the person has died. It can be confusing to be told someone has brain death, because their life support machine will keep their heart beating and their chest will still rise and fall with every breath from the ventilator.
