~~Lead Generation Services - LeadSense~~

In electronics, sense is a technique used in power supplies to produce the correct voltage for a load. Although simple batteries naturally maintain a steady voltage (except in cases of large internal impedance), a power supply must use a feedback system to make adjustments based on the difference between its intended output and its actual output. If this system is working, the latter will be very close to the former.

~~Sense (electronics) - Wikipedia~~

The noun "lead" (rhymes with "red") refers to the metal (as in "a lead pipe"). The noun "lead" (which rhymes with "deed") refers to an initiative, an example, or a position at the front ("in the lead"). The verb "lead" and the noun "lead" are homographs: words that have the same spelling but differ in meaning and (sometimes) pronunciation.
