Learning from Disaster: Risk Management After Bhopal. Learning from Disaster. : Sheila Jasanoff. University of Pennsylvania Press, 1994 - Social Science - 291 pages. 0 Reviews. Selected by Choice magazine as an Outstanding Academic Title. The

1984 lethal gas leak at the Union Carbide pesticide plant in Bhopal, India, may be the most extensively studied industrial disaster in history.

Learning from Disaster: Risk Management After Bhopal ...
The December 1984 disaster in Bhopal, in which upwards of 3,500 persons were killed and as many as 150,000 seriously injured, invites our reflection on many matters. I shall examine the strikingly different role played by tort law in the risk-management complexes of India and the United States, the two sites of the ensuing legal battle.

Learning from Disaster: Risk Management After Bhopal on JSTOR
LEARNING FROM DISASTERS D isasters are tragedies. Yet they can serve as laboratories for understanding the physical and social factors governing them. Valuable information gathered during the hours, days, months, and years following a disaster can lead to policies and practices that reduce the risk of loss of life, property, and natural resources.

The opportunity to engage in a wide-ranging interdisciplinary analysis of the extent, effects and explanations of crisis and disaster, and the use of risk theory.

Masters in Risk, Crisis and Disaster Management | UK MSc
Abstract. This paper develops a framework based on procedural, methodological and ideological elements of participatory vulnerability and risk assessment tools for placing individual approaches within the wide range of work that claims a participatory, local or community orientation. In so doing it draws on relevant experience from other areas of development practice from which the disasters field can learn.

Learning from Experience: Insights from China's Progress in Disaster Risk Management. China has long known more than its fair share of disasters, including earthquakes, typhoons, floods, and droughts. The good news is that in recent decades, the country has made tremendous headway in building its resilience to disasters. Learning from these efforts will be critical to strengthening resilience building efforts in China and beyond.
