The Cost of Living With Lupus | Us in Lupus

The most common feature of lupus is fatigue. It is a major symptom in some patients and can be extremely distressing. The cause of this fatigue is still poorly understood, but generally, energy levels seem to improve once the disease is brought under control.

Symptoms of Lupus — Lupus Trust - A Guy ' s and St Thomas ...

The two major symptoms are joint and muscle pain and an extreme tiredness that won't go away no matter how much you rest. Rashes, depression, anaemia, feverishness, headaches, possible hair loss and mouth ulcers may all be part of the pattern of lupus. Noticeably, whilst the two major symptoms are invariably present, people with lupus can differ greatly in their symptoms and how the illness can affect them - life-threatening for a few, very mild for some.

What is Lupus?

Despite the availability of steroids and other drugs that can help with flare-ups, people with lupus still face frequent -- some would say daily -- fatigue, persistent pain, difficulty moving, and...

Living With Lupus - WebMD

Lupus, also called systemic lupus erythematosus, is not always easy to diagnose because it can be similar to other conditions. Symptoms include inflammation of different parts of the body including the lungs, heart, liver, joints and kidneys. The GP will usually do some blood tests.

Lupus - NHS

Lupus can have a significant impact on a relationship and many people with lupus have very happy, successful and fulfilling relationships. It would be entirely wrong to believe that because a person has lupus they can never experience a happy and fulfilling relationship or that the relationship that they were in before they were diagnosed is doomed to failure.
