Phonic decoding allows a student to identify unfamiliar words, also termed “ word identification. ”

During phonic decoding a student is identifying the individual letters and relating the correct phoneme to each letter. Successful blending of those phonemes or sounds allows the student to identify the word.

Phonics and Decoding - ASCD  
Phonics is an effective way to teach students the alphabetic code, building their skills in decoding unknown words. By learning the alphabetic code early, Adams argued, students can quickly free up mental energy they had used for word analysis and devote this mental effort to meaning, leading to stronger comprehension earlier in elementary school.

Blending in phonics is combining broken up sounds to make a word. For example, you hear ‘ p-i-g ’ and you merge these sounds together to make the single word ‘ pig ’ . It is a key skill of early reading. I have taught children between the ages of 3 to 5 over the last ten years, and I can categorically say that blending has been the biggest barrier to early reading I have seen (particularly ...
