A management information system is an advanced system to manage a company's or an institution's information system. it is a computerized database to organize and program in such a way so that it generates methodical reports for each level of a company. Reports for some special events can easily be obtained from the management information system. in simple words, the Management information system or MIS provides feedbacks to managers themselves about their performances.

An information management system (IMS) is a set of hardware and software that stores, organizes, and accesses data stored in a database. It also provides tools that allow for the creation of standardized and ad-hoc reports. There are numerous kinds of IMSs that can perform specialized business functions, including the following examples:

Systems: Managing the Digital Firm, Kenneth C. Laudon, used for decision-making, and for the coordination, control, analysis, and visualization of information in an organization.

The study of the management information systems involves people, processes and technology in an organizational context. In a corporate setting, the ultimate goal of the use of a management information system is to increase the value and profits of the business. This is done by providing managers with timely and approp

References and Bibliography -  
Management Information System  
Management Information  
Systems, often referred to as MIS,  
is an important discipline because  
it allows people to support  
business operations through  
technology. The term refers to  
the ability to manage a collection  
of systems, which work together  
transferring data throughout the  
organization.
