Maternal Nutrition— Effect on Fetal Growth and Outcome of Pregnancy Prema Ramachandran, M.D. During the "rst half of the 20th century, chronic energy undernutrition due to low dietary intake, repeated infections, and rapid succession of pregnancy were the factors most responsible for maternal undernutrition and consequent adverse

Maternal Nutrition—Effect on Fetal Growth and Outcome of ...

The fetus responds and adapts to undernutrition but by doing so it permanently alters the structure and function of the body. Maternal overnutrition also has long-lasting and detrimental effects on the health of the offspring. There is growing evidence that maternal nutrition can induce epigenetic modifications of the fetal genome.
