Trim & Tilt Components - Mercury Outboard Parts ...

A trim motor can change the angle of your outboard engine so that you can put it in an optimal position. Trim motors run with electro-hydraulic power. An electric pump moves fluid when needed, and its this movement that changes the thrust angle of the outboard. Trim: You use the trim switch to tilt the engine slightly while its running in the water. If you change the trim of a boat in certain situations, you can level it out.
