Model Driven

Architecture Model
Driven Architecture
With Executable

Model-driven
architecture (MDA) is
a software design
approach for the
development of
software systems. It
provides a set of
guidelines for the

Get Free Model Driven

structuring of specifications, which are expressed as models. Model-driven architecture is a kind of domain engineering, and supports model-driven engineering of software systems. It was launched by the Object Management Group (OMG) in 2001.
