By the way, how do I set a loco address more than 3 characters long with the Prodigy Advance? The MRC manual says CV17 and CV18 are "Extended address - upper & lower bytes, 4 digit address" but you can only input a 3 digits value for a CV. And what should go in CV 1 which is the short address? Reply; nemesys. Member since February 2018; 68 posts Posted by nemesys on Tuesday, April 3, 2018 5:19 ...

Problem with my MRC Prodigy Advance2 - Model Railroader ...

To that I've hooked up the MRC Prodigy Advance 2, running the two wires out of the main track connector on the unit, to the track. I turn it on, and when I put a train on the track, the train begins to move, lights, sound everything on. I've tried a basic Bachmann train, as well as two MTH trains, running proto sound lights etc. All have the same problem. I've used a step down regulator ...
