In blues music, the turnaround is a familiar companion. You may recognise the sound of a turnaround from the start or end of your favourite blues tracks. Typically, a turnaround is a 2 bar phrase that sits over the 11th and 12th bars of your usual 12 bar blues and acts to " turn around " the phrase back to the first chord. There are plenty of instances where turnarounds have been used to start a track, the 2 bar phrase would lead into the first bar where the whole band might enter.

We have also integrated some chords into this turnaround in the form of an E7 and B7. The first bar is made up entirely of 8th note triplets, but the fourth beat is made of chords. The E7 chord takes up two thirds of the triplet and the B7 takes up the final triplet beat. Example 5. This turnaround is using a concept called contrapuntal motion.

One more chord to complete the turnaround. Immediately after the Ab7 chord we move back to the simple C chord and then to G to finish off the sequence. The entire chord sequence is as follows C-C7-F-Ab7-C-G , moving again to C once we start out singing the following verse. These are typical ragtime guitar chords found in many songs of this genre.

A musical turn is a curled symbol written above a note on the staff. The note affected by the symbol is only the note that the turn is placed above; it does not affect other notes in the sequence. This main note is a like a home base for the turn. The turn creates a musical flourish that expands the initial single note into a series of four notes.

The most common type of blues turnaround riff is one that employs the simple descending line in FIGURE 1. Starting on beat two of this lick ' s opening bar (which, of course, is measure 11 in the 12-bar cycle), this chromatic descent drops you from the 7 to the 5 (D to B, here in the key of E), leading you straight to the V chord (B7).

When learning how to play jazz guitar, one of the most important chord progressions you can spend time practicing room is the " turnaround. " Turnarounds often occur at the end of a tune, or a section of a tune, and they essentially are used to " turn the tune back around " to the top of the form or start of the next section.
