Natural Capital, Human Capital and Sustainable Economic Growth page 3 I. Introduction Economic growth is an explicit economic and political goal in nearly every nation.

[Natural Capital, Human-Made Capital, Economic Growth, and ...](#)

Natural resources provide the raw materials for production of consumer goods and also capital goods, which are those items used in the production process, such as machinery. Natural resources fall under the 'land' category of the classical economics definition of the factors of production (the other three factors are labor, capital, and entrepreneurship).

[Human, Natural, and Capital Resources in the Production of ...](#)

Natural capital supports human and financial capital: When climate change, overpopulation or pollution threatens nature, societies and economies are threatened, too. Natural capital has long been considered 'free,' which causes the benefits that nature provides to be taken for granted and used at a rate that the Earth cannot replenish.

[Valuing and accounting for natural capital](#)

Therefore, no consensus has been reached on the relationship between natural resource dependence and human capital accumulation, while human capital tends to play a crucial role in the economic growth of resource-rich countries and regions.

[What is the Relationship between Human Capital and ...](#)

Natural capital is the world's stock of natural resources, which includes geology, soils, air, water and all living organisms. Some natural capital assets provide people with free goods and services, often called ecosystem services. Two of these (clean water and fertile soil) underpin our economy and society, and thus make human life possible.

[Natural capital - Wikipedia](#)

Second, many economic models assume that natural capital can be easily and almost indefinitely replaced by human-built capital, when in fact nature and human-built capital are both required for prosperity; for example, destroying an ecosystem to build a housing development may currently generate economic value, at the margin, but if all ecosystems are destroyed, food vanishes, civilisation ...

[Natural capital: preventing the economics of | Oxford ...](#)

Human capital recognizes the intangible assets and qualities that improve worker performance and benefit the economy. These qualities cannot be separated from the people who receive or possess them. In 1964, Nobel Prize winners and University of Chicago economists Gary Becker and Theodore Schultz created the theory of human capital.

[Human Capital: Definition, Examples, Impact](#)

☐ To encourage economic growth and raise the living standards of its citizens, there must be investment in human capital and capital goods. ☐ Economic growth is measured by increases in GDP over time. ☐ How large a nation's GDP can be is determined by the availability and quality of its natural, human, and capital resources.

and human capital to achieve sustainable economic growth. The country should also adopt a new growth model where technology will be at the forefront of economic development. KEYWORDS: Natural Capital, Mineral Asset Value, Economic Growth, Autoregressive Distributive Lag model INTRODUCTION

[THE EFFECT OF NATURAL CAPITAL ON ECONOMIC GROWTH IN ...](#)

Natural capital comprises Earth's natural assets (soil, air, water, flora and fauna), and the ecosystem services resulting from them, which make human life possible. Ecosystem goods and services from natural capital underpin productivity and the global economy.

[The Natural Capital Declaration | Natural Capital Finance ...](#)

It is now widely recognized that an economy's endowment of natural resources, or natural capital, is an important source of economic wealth for both individuals and human societies. This view is directly relevant to the capital approach to sustainability (Barbier, 2016).

[concept of natural capital | Oxford Review of Economic ...](#)

Natural capitalism recognizes the critical interdependency between the production and use of human-made capital and the maintenance and supply of natural capital. The authors argue that only through recognizing this essential relationship with the Earth's valuable resources can businesses, and the people they support, continue to exist.
