Nurses Computers And Information Technology

Nurses have the role of establishing a relationship with their patients and their families; they are responsible for explaining medications, taking vitals and helping patients with daily

Get Free Nurses Computers And Information Technology

needs. In some hospitals, nurses are required to wheel in their workstation (a computer on wheels) to record information about the patient. While typing information on a computer is perceived to be more trustworthy by patients and healthcare professionals alike, it will inevitably create less face-to-face ...
