Pediatric surgical nurses have to be clinically competent, technologically savvy, able to coordinate the multi-disciplinary care team, and tend to the emotional and psychosocial needs of the family and child.

Nursing Care of the Pediatric Surgical Patient

Direct nursing care. The main role of pediatric nurses is to administer directly procedures and medicines to children according to prescribed nursing care plans. Nurses also continually assess the patient by observing vital signs, and developing communication skills with children and family members and with medical teams. Being a support to children and their families is one component of direct nursing care.
