variable (video) |  
Khan Academy

In solving this kind of problems, when both the smaller and larger integers are less than 18, always we have to take the larger integer to form inequality. Then, we have.  $x + 2 < 18$ .

Subtract 2 from each side.  $x < 16$  ----- (1)

Inequality Word  
Problems  
Inequalities, like  
equations, can be

Where To  
Download One  
Variable and used  
to solve problems.  
We use an inequality  
for values that aren't  
the same, or that can  
only be the same up  
to a certain amount.  
When a problem says  
"at least" or "no less  
than," this means the  
number given is the  
very smallest it'll go;  
it can't get any  
smaller.
