Each chapter discusses various otologic and neurotologic disorders followed by a detailed description of the surgical procedure used to treat the condition, and its related complications.

### Otologic and Neurotologic Surgery (Surgical Techniques in ...

In general, otologic and neurotologic surgery is quite different from most other surgical disciplines. It typically requires a very unique set-up in the operating room and a special set of instruments. Also, practically every otologic procedure is performed using the surgical microscope and selective cranial nerve monitoring.

### Surgical Therapy of the Temporal Bone | Neupsy Key

Lateral skull base/neurotologic tumor resection (LSB) was done in 35.9%, and middle ear/mastoid procedures (MEM) were performed in 63.5%. The overall adverse event rate was 10.4%, although it was significantly higher for LSB (24.2%) and lower for MEM (2.6%). The overall mortality rate was 1.4%. Complications occurred postdischarge in 40.4% of cases.
