Patient Satisfaction and the Discharge Process: Evidence ...

Last year, more than two million patients admitted at 1600 hospitals completed Press Ganey patient satisfaction surveys, which include four questions about the discharge process, Clark says. Patients experience discharge as a distinct episode in their hospital care, but it also colors their perceptions of the entire hospitalization.

Increase patient satisfaction by improving your discharge ...

Mean patient satisfaction scores were similar and high in both groups (89.6 for early discharge patients and 90.7 for routine care patients, $p = 0.68$). There was lower cost in the early discharge group, with a mean cost of 8,604 USD versus 10,565 USD in the routine care group (mean difference 1,961 USD, 95% confidence interval, -96 USD to 4,017 USD).

Patient satisfaction is comparable to early discharge ...

Improving the patient discharge process is a top priority and key performance target for many hospitals. Once people no longer require hospital care, they may need to be transferred back to their GP or to a suitable secondary care setting. Unfortunately, delays and poor communication can significantly reduce the quality of the patient experience in this.

How to Improve the Patient Discharge Experience | Streets ...

Discharge planning is a subject of continuing interest, particularly to nurses, as nurses have a significant role in facilitating hospital discharge. Outcomes such as improved patient satisfaction and reduced rebound admissions have been measured and can be attributed to discharge planning.

Hospital discharge planning: evidence, implementation and ...

The findings of this study indicate the importance of an interprofessional approach to discharge teaching to improve patient satisfaction and the quality of teaching. Adult learning theory and patient-centered care using a patient-engagement model is recommended for inpatient rehabilitation and home ...

Patients' perceptions of the quality of discharge teaching ...

Patients responded that they felt ready for discharge (86.6% vs 84.9%, $P = .01$) and were satisfied with instructions for home care (87.8% vs 85.3%, $P < .01$). Discussion: This study finds that a novel discharge instruction set produced by both the nursing and physician staff may improve patient perceptions with the discharge process.

The Impact of Revised Discharge Instructions on Patient ...

Patient satisfaction scores obtained from the Press Ganey database were compared from 1 year before to 1 year after implementation of the revised discharge instructions. There were approximately 1600 to 1900 patients per year, with sample size varying depending on the survey question (see Tables 1 and 2). Table 1.

The Impact of Revised Discharge Instructions on Patient ...

Patient satisfaction. 48 h post-discharge (study-specific measures) The mean of the correct answers on wound care in the questionnaire was 2.7 ± 0.7 in the M group and 2.4 ± 0.8 in the P group ($P < 0.05$). The rate of satisfaction was 90.5% in the M group and 90.9% in the P group ($P < 0.05$) D'Amore et al. (2011) USA Telephone call (nurse)

Discharge communication practices and healthcare provider ...

Discharge planning is the process by which the hospital team considers what support might be required by the patient in the community, refers the patient to these services, and then liaises with these services to manage the patient's discharge. Poor discharge planning can lead to poor patient

Chapter 35 Discharge planning - NICE

The NHS Patient Experience Framework includes an evidence-based definition of patient experience and considers how this concept should be measured.³ It is a broader entity than patient satisfaction and “reflects occurrences and events that happen independently and collectively across the continuum of care”.⁴ Measurement is therefore more complex and needs to include the assessment and ...

Patient Satisfaction and the Discharge Process: Evidence ...

Overall patient satisfaction with discharge teaching was high for both groups, with no difference between groups. Frequently discharged with prescriptions for new medications and/or treatments, hospitalized patients may have new physical limitations that must be accommodated in the home environment before discharge.

Use of a daily discharge goals checklist for timely ...

Patient satisfaction is about a patient's expectations for his or her care encounter, according to AHRQ. In other words, patient satisfaction is a subjective healthcare measure. Two patients can receive the exact same care, but have different satisfaction levels because they had different subjective expectations, AHRQ said.
