Pediatric Endoscopy - ScienceDirect

An upper endoscopy is used to look for problems, such as bleeding, swelling, polyps, ulcers, or infection. An upper endoscopy in children is often used to find the cause of abdominal pain, difficulty swallowing, or nausea and vomiting. It may also be done to remove foreign bodies such as a swallowed coin or toy.

Upper Endoscopy in Children - What You Need to Know

The role of endoscopy in the overall management will depend on a number of factors, including but not limited to the specific clinical features, the availability/appropriateness of non-endoscopic approaches, and the available skills of the endoscopist. This Guideline tries to address this issue of endoscopy skills, and certainly the upcoming ESPGHAN/ESGE Guide- line on training in pediatric endoscopy will help in this respect.
