Practice A Multimodality ...

We advocate a hierarchy of steps toward the use of perfusion imaging in clinical decision making that is, in our opinion, appropriate:

(a) First, standardization of imaging protocols and image processing tools (CT vs MR

Where To Download Perfusion Imaging In

imaging, what algorithm to use, differences across vendors) and data acquisition (rate of contrast agent injection, amount of contrast agent, toggling table vs static table) should be performed. These issues are easier to solve and require a cooperative effort
