Answer: Since the man steadily moves forward as the time progresses so the following graph will represent his motion till he covers 13 m. In 5 s he moves through a distance of 5 m and then in next 3 s comes back by 3 m. Thus in 8 s he covers only 2 m, as shown in the graph he would fall in the pit in 37 s.

Answer : Uniform velocity: If a body covers equal displacements in equal intervals of time however small may be the body is said to have uniform velocity. Its motion is said to be uniform. In other words the velocity of a body is said to be uniform if both its magnitude and direction do not change. Variable velocity: If a body covers unequal displacements in equal intervals of time it is said to be moving with variable velocity and its motion is said to be non-uniform. The velocity of the body may ...
