Consider the design of a pile cap supporting two pile and a single column on the pile cap. Data. Pile Diameter 600mm, Design Load 3000 kN. Cover to the reinforcement 50mm, Grade of concrete 30, Characteristic strength of steel as 500 N/mm<sup>2</sup>. Size of the column on the pile cap 500x500mm. Calculate the dimensions of the pile cap. consider 150mm offset from the pile and space between piles as 2.5 times pile diameter. Width = 500 + 150 + 150 = 800mm

As it is very difficult to bore or drive piles exactly vertically, the pile cap should be able to accommodate some deviation in the final position of the pile heads. The pile cap should overhang the outer piles, typically by a distance of 100-150 mm on all sides, depending on the size of the piles. Pile caps are constructed by excavating an area around the group of piles to enable formwork to be inserted. The pile tops may be trimmed to ensure they are at the same height.

Piled foundations are one of the first aspects of scheme design a structural engineer needs to consider during a project's development. It is at this crucial stage that, without any specialist input, the structural engineer must make recommendations based on the typically limited knowledge they have on the subject.

**Technical Guidance Note (Level 2, No. 8) - Designing a pile cap**

Design the pile cap shown in the following figure with 12 in. diameter piles and a service load capacity of 50 tons each. The pile cap has normal-weight concrete with a compressive strength of 4000 psi and Grade 60 reinforcement. And the piles are embedded 4 in. into the pile cap. The axial loads on the column are due to dead and live loads and are equal to 425 and 250 kips, respectively.

**Pile Supported Foundation (Pile Caps) Analysis and Design**

Assumptions Involved In The Design Of Pile Caps 1- Pile cap is perfectly rigid. 2- Pile heads are hinged to the pile cap and hence no bending moment is transmitted to piles from pile caps. 3- Since the piles are short and elastic columns, the deformations and stress distribution are planar.
