There is no "best" design applicable for all facilities and arguably not even a single "best" design for a given facility. For this reason, Planning and Designing Research Animal Facilities is not intended to be a "how to" book. The goal is to cover the basic programmatic requirements of animal research facilities, provide ideas for meeting those requirements while, hopefully, stimulating the creative process in which designers in consultation with those who work in animal ...

COVID-19 Resources. Reliable information about the coronavirus (COVID-19) is available from the World Health Organization (current situation, international travel). Numerous and frequently-updated resource results are available from this WorldCat.org search. OCLC's WebJunction has pulled together information and resources to assist library staff as they consider how to handle coronavirus ...

Planning and designing research animal facilities (Book ...

Designing Research. In good scientific practice the design of an experiment is determined by what the scientist hopes to discover. While most biomedical research does not use animals, some questions about how a drug works or how the body functions, can only be answered by studying a whole-body system. The findings of any scientific research are only meaningful when the limitations of the methods are understood.

Designing Research | ari.info | ari.info

If a study is not designed to yield robust results and publications are not reported with enough detail, the animals and research resources used in that study are wasted. Appropriate experimental design and statistical analysis techniques are key means of minimising the use of animals in research. We have a number of resources to aid researchers to improve the design and reporting of research using animals.

The Animal Production Systems (APS) group is one of twelve chair groups within the Department of Animal Sciences at Wageningen University. Using concepts of systems analysis, we aim at providing integrated analysis of existing and innovative animal production systems to design a sustainable food future.
