

## Potential Energy Diagrams Worksheet Answers

Getting the books potential energy diagrams worksheet answers now is not type of challenging means. You could not single-handedly going past books amassing or library or borrowing from your contacts to entrance them. This is an agreed simple means to specifically get lead by on-line. This online message potential energy diagrams worksheet answers can be one of the options to accompany you subsequently having new time.

It will not waste your time. receive me, the e-book will enormously tone you other issue to read. Just invest little times to retrieve this on-line pronouncement potential energy diagrams worksheet answers as capably as review them wherever you are now.

1. Answer the following questions based on the potential energy diagram shown here: Does the graph represent an endothermic or exothermic reaction? Label the position of the reactants, products, and activated complex. Determine the heat of reaction,  $\Delta H$ , (enthalpy change) for this reaction. Determine the activation energy,  $E_a$  for this reaction. How much energy is released or absorbed during the reaction?

Well, I was assuming that this ground was the H equals zero line. And we know that the gravitational potential energy is mgh. And where H equals zero, the potential energy is zero. So when this mass gets down to the final point, which I'm representing in this diagram, it no longer has any potential energy since the H would be zero.
