Poultry genetics, breeding and biotechnology.

Some have argued that as modern poultry breeding is dominated by U.S. and European-based poultry companies, the genetics of commercial chickens is based on Western breeds such as the Cornish and Plymouth Rock, and Rhode Island Red.101, 103 That, in turn, has resulted in relatively less knowledge about breeds native to various regions. However, as performance or health problems have emerged in commercial broiler or layer strains, there has been renewed interest in understanding the genetic ...
