School nurse: case study | RCNI

This is the first study of primary healthcare nurses' experiences during the COVID-19 pandemic. The study findings highlighted a concerning level of insecurity around primary healthcare nursing employment, as well as issues with the availability of personal protective equipment for these nurses.

The Experiences of Primary Healthcare Nurses During the ...

The studies looked at nurses involved in first contact care (including urgent care), ongoing care for physical complaints, and follow-up of patients with a particular chronic conditions such as diabetes. In many of the studies, nurses could get additional support or advice from a doctor.

Nurses as substitutes for doctors in primary care | Cochrane

A primary source is a document or record which reports a study, experiment, event or other phenomenon firsthand. Primary sources are usually written by the person(s) who did the research, conducted the study, ran the experiment, or witnessed the event. Primary Sources include: pilot/prospective studies; cohort studies; survey research; case studies

Primary & Secondary Sources - Nursing - LibGuides at ...

If necessary, a primary care nurse will also collect samples, such as mucus or blood samples, which can be later studied in a laboratory to aid in diagnosing illnesses and infections. As a primary care nurse, you will often be responsible for much of the direct patient care, such as treating a patient after a diagnosis has been made.
