[Answer Key Chapter 2 - Principles of Macroeconomics | OpenStax.](#) 1. The opportunity cost of bus tickets is the number of burgers that must be given up to obtain one more bus ticket. Originally, when the price of bus tickets was 50 cents per trip, this opportunity cost was $0.50/2 = .25$ burgers. The reason for this is that at the original prices, one burger (\$2) costs the same as four bus tickets (\$0.50), so the opportunity cost of a burger is four bus tickets, and the opportunity cost of a bus

Recognizing that a course in economics may seem daunting to some students, we have tried to make the writing clear and engaging. Clarity comes in part from the intuitive presentation style, but we have also integrated a number of pedagogical features that we believe make learning economic concepts and principles easier and more fun. These features are very student-focused.
