These reviews apply psychological research and principles of scientific thinking to ideas presented in the books. They aim to show how critical thinking can help people assess arguments promoted in the popular culture, and how to separate those that are scientifically sound from those based on "psychobabble"-pop-psych notions dressed up in fancy, sciency-sounding language.

How to Spot Pseudoneuroscience and Biobunk. This opens in a new window. When it comes to pseudoscience, social psychologist and writer Carol A. Tavis is a self-appointed curmudgeon. "I have spent many years lobbing hand grenades at psychobabble - that wonderful assortment of pop psych ideas that permeate our culture in spite of having no means of empirical support," said Tavis at the 24 th APS Annual Convention. "Today, however, we face an even greater challenge because in this era ...
