Discussion. Available evidence suggests that psychotic experiences are often present in individuals with common mental disorders such as anxiety and depression, and that rather than solely indicating an imminent transition to a psychotic disorder, they are frequently indicators of severity of common mental distress.

While further research is required to assess the mechanisms behind differences in the effectiveness of interventions and the feasibility of implementing interventions in LTC healthcare, the findings indicate that psychological interventions utilising different formats, durations and facilitators which actively involve and enable patients to have self-efficacy over their care may result in significant QOL improvements for LTC patients.

Effectiveness of psychological interventions to improve ...

Psychological interventions refer to treatments based on a theory of psychological functioning while psychosocial interventions represent less specific interventions designed to improve mental health through general support, advice and encouragement.¹¹ This includes psychoeducational strategies, cognitive-behavioural therapy, interpersonal psychotherapy, non-directive counselling, supportive interactions and tangible assistance, through individual or group sessions.¹²

Although the two fields may have different objectives, it can be argued that sport psychology interventions—specifically psychological skills training (PST) interventions—can inform SEP professionals' research and applied practices with both the sport and exercise populations. Psychological skills training includes the strategies and techniques used to develop psychological skills, enhance sport performance, and facilitate a positive approach to competition.

Positive psychology interventions, or PPIs, are a set of scientific tools and strategies that focus on increasing happiness, well-being, and positive cognitions and emotions (Keyes, Fredrickson, & Park 2012). Existing research shows that over the years, psychologists have focused more on treatment than on prevention (Bolier, Haverman, 2013).
