Respiratory Endoscopy Upper and lower airway disease is a common cause of poor performance particularly in high performance/ high intensity disciplines such as racing, eventing and polo. Respiratory endoscopy is very much part of routine veterinary care of racehorses, particularly during and after exercise.

Respiratory Endoscopy & Gastroscopy – Shotter & Byers

Respiratory Endoscopy describes the cooperation between all the members of the healthcare team, and as such is a valuable resource not only for medical staff, but also for radiological technicians and nursing staff who contribute significantly in the care of the patients undergoing these invasive procedures.

Respiratory Endoscopy | Takehiro Izumo | Springer

Endoscopy describes many procedures that look inside the body using some type of endoscope, a flexible tube with a small TV camera and a light on one end and an eyepiece on the other. The endoscope allows doctors to examine the inside of certain tube-like structures in the body. Many endoscopes transmit the doctor's view to a video screen.

Endoscopy Guide: Causes, Symptoms and Treatment Options

Endoscopy is useful for investigating many systems within the human body; these areas include: Gastrointestinal tract: esophagus, stomach, and duodenum (esophagogastroduodenoscopy), small intestine (enteroscopy),... Respiratory tract: Nose (rhinoscopy), lower respiratory tract (bronchoscopy). Ear: ...

Respiratory endoscopy is performed to evaluate the nasal passages, larynx (throat), guttural pouches, trachea and large bronchioles and to take samples from these areas as required. The most common endoscopy is performed in the standing horse, with or without sedation.

Endoscopy - Hambleton Equine Clinic

An endoscopy is a procedure used in medicine to look inside the body. The endoscopy procedure uses an endoscope to examine the interior of a hollow organ or cavity of the body. Unlike many other medical imaging techniques, endoscopes are inserted directly into the organ. There are many types of endoscopes. Depending on the site in the body and type of procedure an endoscopy may be performed either by a doctor or a surgeon. A patient may be fully conscious or anaesthetised during the procedure. M

Endoscopy - Wikipedia

An endoscopy is a procedure where organs inside your body are looked at using an instrument called an endoscope. An endoscope is a long, thin, flexible tube that has a light and camera at one end. Images of the inside of your body are shown on a television screen.

Endoscopy - NHS

Upper respiratory endoscopy involves placing a flexible camera into the horse's nasal passages. From the nasal passages, the turbinates of the nose can be assessed and the camera advanced all the way back to the horse's larynx and pharynx, where the luminal structures can be assessed visually.
