Though reversible crochet colorwork may not be a brand-new idea, the technique that I have developed is the result of many years of experimentation and adapting techniques learned from others. The result is a truly reversible colorwork that is not stiff and produced clean lines, which allows for a wide variety of exciting designs.

Intarsia Crochet Colorwork. This method is used when working blocks of color together and can be reversible. Individual balls or sections of yarns are used and kept in each section. Bobbins are very handy for this type of crochet colorwork. Each color is worked across an area and then that color is dropped as the next color is picked up.
