Important Note for Sage Line 50 v12 users. Sage have released a bug fix for the v12 SDO. You should ensure that SDOEng120.dll in the Windows\System32 folder is version 12.0.1.60. The easiest way to do this is to download and run this small install program: SDOv12-1-60.exe. As well as installing the new DLL it will install a small utility "SDO Version Check" that will show the version numbers of all installed versions of the SDO.

Sage Line 50 on a network. Sage Line 50 on a network. Since fully networking our office some months ago we find that navigating around Sage Line 50 (v12) is slower than on a 'stand-alone' PC by as much as a factor of ten! For example 'Check Data' now takes up to 20 minutes compared to the previous 2-3 minutes; in fact all Sage processes now seem to take 'forever'.

Costs the same as SAGE, but you get to use it again and again. However, I assume the client logs in with the user name and password you are trying so might be best to try SAGE first. Also, are you using exactly the same version? There are later issues of the same version, or they may have downloaded an update you don't have.
