The wizard aims to help users by dividing large or complex tasks into segments. Use the wizard if the user has to accomplish a long task (such as filling out a long questionnaire) or a task that is unfamiliar to the user. The flow should consist of a minimum of 3 and a maximum of 8 steps. The wizard can be used for both create and edit scenarios.

The document generation wizard lets you save the defined parameter set. First, you enter and save numerous parameters for base and target documents. Based on these definitions, you can select consolidation methods and choose a list of relevant business partners. Once you save the defined parameter set, you can run the wizard periodically according to your company's business practices.

Wizard

AWS Launch Wizard for SAP is a service that guides you through the sizing, configuration, and deployment of SAP applications on AWS, and follows AWS cloud application best practices . AWS Launch Wizard reduces the time it takes to deploy SAP applications on AWS. You input your application requirements, including SAP HANA settings, SAP landscape settings, and deployment details on the service console, and Launch Wizard identifies the AWS resources to deploy and run your SAP application.
