Section 13 Kolmogorov-Smirnov test. Suppose that we have an i.i.d. sample X 1, . . . , X n with some unknown distribution P and we would like to test the hypothesis that P is equal to a particular distribution P 0, i.e. decide between the following hypotheses: H 0: P = P 0, H 1: P = P 0. We already know how to test this hypothesis using chi-squared goodness-of-fit test.
