Unifying Themes in Biology (continued) Organisms
Maintain Homeostasis.

Page 26/46

Homeostasis- the maintainingof constant internal conditions; cells perform within a limited range of conditions. Breakdownscan be lifethreatening. Negative feedback causes a response Page 27/46

that often returns the system back to its original state

Biology in the 21St Century
Six themes serve to unify
the study of biology: (1)
cell structure and function
Page 28/46

(2) stability and homeostasis (3) reproduction and inheritance (4) evolution (5) interdependence of organisms (6) matter, energy, and organization.

Chapter 1 :: Themes of Biology :: Section 1-1 Flashcards ... Section Unifying Themes Of Biology Chapter 1: Section 2 Unifying Themes of Biology. is the process by which the genetic makeup of a Page 30/46

population changes over time. One way in which it occurs is through the natural selection of genetic traits that give an individual an advantage in a particular environment.

Section Unifying Themes Of Biology 1 2 Study Guide MAIN THEMES OF BIOLOGY 1. All levels of life have systems of related parts. System: is an organized group of related parts that interact to form a whole. Page 32/46
